AGRICAST

SPECIALISTS IN HEAVY CULTIVATION PARTS

www.agricast.net

info@agricast.net

Agricast has provided replacement and bespoke parts for cultivation equipment to manufacturers, dealers and farmers for over 25 years. Based on our own farm in Lincolnshire our family business is now the UK's leading specialist in Cambridge roll rings. We also supply a wide range of press rings, disc blades and subsoiler wear parts as well as offering bespoke alterations and fabrication in our own workshop.

We are a small company but pride ourselves on being able to offer top quality products at the best prices.

ABOUT OUR ISO ACCREDITED RINGS

Our large range of roll rings are precision cast in ISO 9001 accredited foundries. The high quality materials, production techniques and quality control procedures ensure that our rings are the best available.

STANDARD CAMBRIDGE RINGS AND BREAKERS

Our traditional 4 spoke rings are available in sizes from 510mm (20") to 660mm (26") for any axle size up to 75mm (3"). These can be used with or without breaker rings for better cleaning and clod breaking - speak to us for advice.

CRR-19-VA
18.5"/470mm Ring to Suit
Vaderstad Rollers.

CRR-20-XX-EB
20"/510mm - 20" Roll Ring with
Extended Boss

19"/480mm Breaker Ring to suit
Vaderstad

CBR-24-RO
25"/630mm
25" Breaker with Rounded Points

CBR-24-HE
25"/630mm - 25" Breaker Ring
to suit HEVA rollers

WHAT ARE DUCTILE STEEL RINGS?

Ductile steel is a different grade of cast iron which offers greater impact resistance due to an increase in tensile strength from 250 MPa to 500 MPa.

If you are having problems with broken rings try our range of Ductile steel replacements available in a variety of styles and sizes with others available as special orders.

SPACERS - 16mm wide as standard but also available in any width to order

AXLE LOCKING COLLAR
To suit 50, 60 and 65mm axles

ABOUT OUR DISC BLADES

Our disc blades are made from high carbon or boron steel. Hot rolled, formed and heat treated in quality control manufacturing process. This results in a blade that meets or exceeds OEM standards in most cases.

Available from stock in a large range of sizes from 450mm (18") to 915mm (36") diameter.

AXLES FABRICATED ON SITE

We stock only the highest quality materials for replacement axles, steel strength is far greater than mild steel bar stocked by regular steel suppliers.

We machine all axles in our workshop to your exact requirement. Agricast was supplier of all OEM axles to Simba Machinery, our experienced machine operators can produce axles for you today.

Cambridge Roll Axle
50mm to 65mm Round Bar

Round Disc Axle - 45mm to 60mm Round Disc Axles To Suit Simba MK2,3C,23C & MK4

Square Disc Axle - 30mm to 40mm Square Disc Axles To suit Parmiter, Besson & other disc harrows

Press Axle - 50 to 60mm Press Axles To Suit Simba, Gallucho and other presses

Specialised Axles
Rexius Roller and Rexius Twin all sizes

MACHINE SHOP

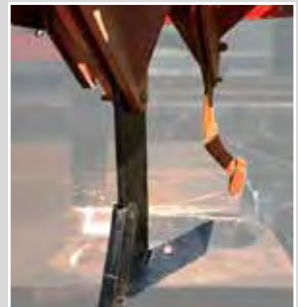

Agricast has a well-equipped machine shop with lathes, turning, milling and drilling machines. We also have threading machines, for both left hand and right hand threads. Our range of machines means that we can customise a wide range of parts, such as axles, roll rings and press rings to suit your specific needs; give us a call to discuss your requirements today.

PLASMA CUTTER

In 2013 Agricast installed a CAD controlled 200 Amp plasma cutter, meaning that we are able to cut out sheet steel in thicknesses between 2mm and 32mm. This machine allows us to fabricate subsoiler legs in HARDOX 500 to suit almost any machine and enables us to create custom legs so you can use different wearing parts. We also use this accurate cutting tool to fabricate brackets, end plates and profiles to alter and adapt your heavy cultivation machines:

- add cultivation tines to your press;
- convert your single press to a double press;
- change your crumbler bar and scrapers;
- see your ideas cut out and on our machine.
