ABOUT AGRICAST

Agricast has provided replacement parts for cultivation equipment to manufacturers, dealers and farmers for 35 years. Based on our own farm in Lincolnshire the family business is now the UK's leading specialist in Cambridge roll rings.

Over the last 5 years we have also increased our range of other wearing parts and after market solutions. Our well-equipped manufacturing and fabrication workshop allows us to provide customer focused solutions whether it be low disturbance legs, replacement packers or machine alterations.

We are a small company but pride ourselves on being able to offer top quality products at the best prices.

**Speak to Will Robinson or
Thomas Knights today:**

info@agricast.net

**Agricast was established to supply
some original parts direct to Simba
35 years ago.**

**We continue to specialise in
manufacturing non-OEM Agricast Parts
to fit Simba machines in the home
county of the famous British brand.**

Standard Cambridge Roll Rings	4-5
Cambridge Roll Rings To Suit Specific Machines	6-7
Press Rings	8-9
Packer Parts	10-11
Disc Harrow Parts	12-15
Subsoiler Parts	16-23
Cultivation Parts	24-27
Bearings	26-33
Axles	34-35
Bushes, Pins & Springs	36-37
Tungsten Parts	38-39
Plough Points	40-41
Bolts	42-43
Nuts & Washers	44-45
Packers	46-47

Agricast Parts are designed to match or exceed the Original Equipment Manufacturer's (OEM) specifications and are not manufactured by the OEM. All trademarks are the property of the respective OEM and are only used to identify the machine for which the part will fit.

Agricast can collect, refurbish and reassemble your existing press ring axles in our workshop. We offer a full range of service options from simple re-ringing to full new bolt on units and conversions.

We can also fit our wear plates to extend the life of your press at a fraction of the cost – ask us when it's the optimum time to replace your rings.

Agricast's new Press Roll Ring (PRR) are a direct replacement for many existing packers. Drive has been improved by the addition of small notches and durability increased by making each disc up to 20% thicker.

Our disc blades are made from Boron Steel which is formed and heat treated in the strictest quality control manufacturing processes.

This results in a blade that meets or exceeds OEM standards in most cases.

Combination Holes

Many of our discs are supplied with a “combination hole” which is suitable for use on both round and square axles as illustrated in this drawings.

AGRICAST GLX

The Agricast GrassLand Xtra (GLX) is a development of a popular low disturbance point and is backwards compatible with Sumo GLS and Grassland machines.

The wearing life has been significantly improved by changing the shape of the body and adding extensive hardfacing along with option of solid tungsten carbide to the wings.

Code	Description	Manufacturer
SSL-GLX-FL	GLX 20mm FULL LEG	Agricast
SSL-GLX-LB	GLX 20mm LEG BOTTOM	Agricast
SSS-GLX-75	GLX SHIN 20x75	Agricast
SSP-GLX-W	GRASS LAND XTRA POINT – FITS SUMO GLS	Agricast & Sumo
SSP-GLX-WHF	GRASS LAND XTRA POINT WITH TUNGSTEN AND HARDFACING - FITS SUMO GLS	Agricast & Sumo

AGRICAST LDX

The Agricast Low Disturbance Xtra (LDX) system is an evolution of the Simba LD penetration point. Increasing the tungsten protection to a full 200mm depth along with high chrome steel casting ensures maximum wear life for the point.

Interchangeable wings, ranging from 100 to 200mm wide, offer flexibility for OSR establishment or traditional subsoiling with minimum draft and disturbance.

Code	Description	Manufacturer
SSL-LDX-20-FL	LDX 20mm FULL LEG	Agricast
SSL-LDX-20-LB	LDX 20mm LEG BOTTOM	Agricast
SSW-LDX-20-125-WHF	LDX 125mm WING TO SUIT 20mm LEG – TUNGSTEN HARDFACED	Agricast

SSW-LDX-20-200	LDX 200mm WING TO SUIT 20mm LEG	Agricast
SSP-LDX-W5	LOW DISTURBANCE XTRA POINT	Agricast & Simba
SSP-LDX-HF	LOW DISTURBANCE XTRA POINT – HARD FACED	Agricast & Simba

AGRICAST STX

New for 2022 the Stealth Xtra (STX) is the latest in the line up of low disturbance solutions.

Developed due to customer demand this new point is compatible with Heva Stealth and Evolution machines but offers significant improvements in key areas to increase the life of the point, leg and fixings.

Code	Description	Manufacturer
SSL-STX-FL	STX 15mm FULL CONVERSION LEG - HARDOX500	Agricast
SSL-STX-LB	STX 15mm WELD ON LEG BOTTOM - HARDOX500	Agricast

Our Subsoiler Parts are made from high chrome alloy steel which is heat treated and quenched to achieve maximum wearing life.

Solid Tungsten Carbide tiles are brazed onto CNC machined surfaces to further extend the life. Our top performing parts also have specialist hardfacing to overcome heat affected zones.

We stock only the highest quality materials for replacement axles, tensile strength is far greater than mild steel bar stocked by regular steel suppliers, giving greater resistance to breakages.

We machine all axles in our workshop to match your exact requirements. Agricast was a supplier of axles to Simba and our experienced machine operators can produce axles for you today.

Introduced in 2018 after successful trials in 2016/17 on our own farm this range of Tungsten Carbide plough parts significantly outlasted other on the market. Above is a selection of the points and other parts available, please call to see if we can supply for your plough. The range is further complimented with a wide range of cultivation points along with weld on strips in many shapes and sizes.

Please visit our online shop to discover our full range of tungsten parts:

PACKERS

Bolt on packers to fit any machine.

Custom made to your specification in a variety of styles to suit many soil types.

Code	Title	Description
LCP-600	600mm Low Cost Packer	Using recycled part worn press rings welded to 600mm central Wear Plate and mounted on 273mm steel tube. Weld in stub axle to suit 50mm or 60mm bearings
PRR-610	610mm PRR Packer	610mm diameter Press Roll Rings, 6mm thick per half with notches to aid drive Rings are tensioned onto a 60mm diameter high tensile axle. All parts are fully replaceable, greasable and fully sealed. Heavy Duty press bearings also available. Hardox scrapers and Grade 8.8 U-Bolts ready to fit to many machines new and old.
PRP-710-ZONED	710mm Zoned Packer	710mm diameter Press Roll Rings with custom made spacers to place a pair of rings directly behind LDX legs on a converted Simba Solo Replaceable rings and fully sealed press bearings
STP-650	650mm Steel Tensioned Packer	610mm diameter D profiled Press Roll Rings with a central 650mm Drive Plate Rings are tensioned onto a 273mm diameter steel tube so are fully replaceable Demountable stub axle to suit 50mm or 60mm bearings
U-575	575mm U-Shaped Open Soil Packer	

575mm U-Shaped Open Soil Packer

650mm Steel Tensioned Packer

610mm PRR Packer

WORKSHOP & FABRICATION

Our well-equipped workshop is ran by experienced machinists with the back up of qualified engineers and knowledgeable farmers.

Agricast has a well-equipped machine shop with lathes, turning, milling and drilling machines. We also have threading machines, for both left hand and right hand threads. Our range of machines means that we can customise a wide range of parts, such as axles, roll rings and press rings to suit your specific needs; give us a call to discuss your requirements today.

In 2013 Agricast installed a CAD controlled 200 Amp plasma cutter, which has since been used to cut out subsoiler legs from Hardox 500 material, as well as a wide range of other parts. New for 2022 we are installing a new high definition plasma unit which will be able to continue producing parts with even higher quality.

We also use this accurate cutting tool to fabricate brackets, end plates and profiles to alter and adapt your heavy cultivation machines:

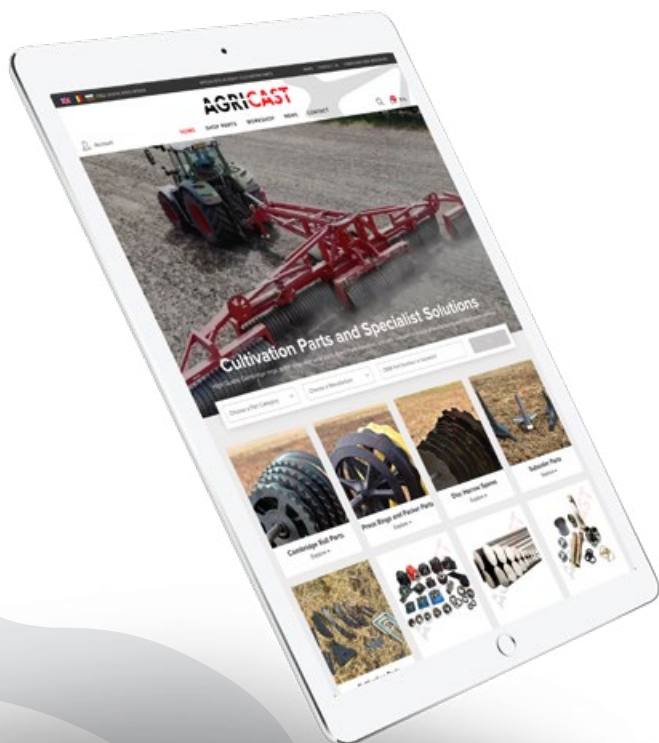

- add cultivation tines to your press;
- convert your single press to a double press;
- change your crumbler bar and scrapers;
- see your ideas cut out and on our machine.
