ABOUT AGRICAST

Agricast has provided parts for cultivation equipment to manufacturers for over 35 years. In the year 2000 we expanded this to supply dealers, farmers and contractors across Europe and beyond.

Based on our own farm in Lincolnshire the family business established its self as the UK's leading specialist in Cambridge roll rings. Over the last 5 years we have increased our range and capability to produce a wide range of other wearing parts and after market solutions. Our well-equipped manufacturing and fabrication workshop allows us to provide customer focused solutions whether it be low disturbance legs, replacement packers or machine alterations.

We are a small company but pride ourselves on being able to offer top quality products and service at the best prices.

Speak to Will Robinson, Thomas Knights or Phil MacIntosh today:

01673 857619

info@agricast.co.uk

Agricast was established to supply some original parts direct to Simba 35 years ago.

We continue to specialise in manufacturing non-OEM Agricast Parts to fit Simba machines in the home county of the famous British brand.

Subsoiler Parts	4-17
Cambridge Roll Parts	18-21
Press Rings and Packer Parts	22-29
Disc Harrow Spares	30-39
Cultivation Parts	40-45
Bearing Stock	46-55
Axles	56-59
Pins Bushes Springs Etc	60-63
Tungsten Parts	64-67
Fasteners	68-71
Workshop & Fabrication	72-73
Refurbishment & Bespoke	74-75

Agricast Parts are designed to match or exceed the Original Equipment Manufacturer's (OEM) specifications and are not manufactured by the OEM. All trademarks are the property of the respective OEM and are only used to identify the machine for which the part will fit.

SUBSOILER PARTS LOW DISTURBANCE

AGRICAST LDX

The Agricast Low Disturbance Xtra (LDX) system is an evolution of the Simba LD penetration point. Increasing the tungsten protection to a full 200mm depth along with high chrome steel casting ensures maximum wear life for the point.

Interchangeable wings, ranging from 100 to 200mm wide, offer flexibility for OSR establishment or traditional subsoiling with minimum draft and disturbance.

Code	Description	Manufacturer

Our Subsoiler Parts are made from high chrome alloy steel which is heat treated and quenched to achieve maximum wearing life.

Solid Tungsten Carbide tiles are braized onto CNC machined surfaces to further extend the life. Our top performing parts also have specialist hardfacing to overcome heat affected zones.

AGRICAST GLX

The Agricast GrassLand Xtra (GLX) is a development of a popular low disturbance point and is backwards compatible with Sumo GLS and Grassland machines.

The wearing life has been significantly improved by changing the shape of the body and adding extensive hardfacing along with option of solid tungsten carbide to the wings.

Code	Description	Manufacturer

AGRICAST STX

New for 2022 the STealth Xtra (STX) is the latest in the line up of low disturbance solutions.

Developed due to customer demand this new point is compatible with Heva Stealth and Evolution machines but offers significant improvements in key areas to increase the life of the point, leg and fixings.

Agricast can collect, refurbish and reassemble your existing press ring axles in our workshop. We offer a full range of service options from simple re-ringing to full new bolt on units and conversions.

We can also fit our wear plates to extend the life of your press at a fraction of the cost – ask us when it's the optimum time to replace your rings.

Bolt on packers to fit any machine.

Custom made to your specification in a variety of styles to suit many soil types.

Code	Title	Description
LCP-600	600mm Low Cost Packer	Using recycled part worn press rings welded to 600mm central Wear Plate and mounted on 273mm steel tube. Weld in stub axle to suit 50mm or 60mm bearings
PRR-610	610mm PRR Packer	610mm diameter Press Roll Rings, 6mm thick per half with notches to aid drive Rings are tensioned onto a 60mm diameter high tensile axle. All parts are fully replaceable, greasable and fully sealed. Heavy Duty press bearings also available. Hardox® scrapers and Grade 8.8 U-Bolts ready to fit to many machines new and old.
PRR-710-ZONED	710mm Zoned Packer	710mm diameter Press Roll Rings with custom made spacers to place a pair of rings directly behind LDX legs on a converted Simba Solo Replaceable rings and fully sealed press bearings
STP-650	650mm Steel Tensioned Packer	610mm diameter D profiled Press Roll Rings with a central 650mm Drive Plate Rings are tensioned onto a 273mm diameter steel tube so are fully replaceable Demountable stub axle to suit 50mm or 60mm bearings
U-575	575mm U-Shaped Open Soil Packer	575mm diameter rolled open channel packer for light to medium soils. Can be made into single or double row packers with maximum single span of 3.0m to suit 50 to 65mm bearings

AXLES DISC HARROW AXLES

We stock only the highest quality materials for replacement axles, tensile strength is far greater than mild steel bar stocked by regular steel suppliers, giving greater resistance to breakages.

We machine all axles in our workshop to match your exact requirements. Agricast was a supplier of axles to Simba and our experienced machine operators can produce axles for you today.

Introduced in 2018 after successful trials in 2016/17 on our own farm this range of Tungsten Carbide plough parts significantly outlasted other on the market. Above is a selection of the points and other parts available, please call to see if we can supply for your plough. The range is further complimented with a wide range of cultivation points along with weld on strips in many shapes and sizes.

Please visit our online shop to discover our full range of tungsten parts:

We can supply many custom fasteners from M10 to M100. Bolts can be made to your own specification with greasing holes or grooves and bespoke thread pitches/lengths. Washers and nuts also made and tapped to your requirements.

WORKSHOP

Agricast has a well equipped machine shop with lathes, turning, milling and drilling machines. We also have threading machines, for both left hand and right hand threads.

With our selection of machines we can customise a wide range of parts, such as axles, roll rings and press rings to suit your specific needs.

As farmers we understand end user requirements and in business we have worked with major manufacturers for over 35 years. We are able to advise on your workshop projects and make parts to suit for replacement / refurbishment or customisation - call us today on **01673 857619**.

HD Plasma Cutting and Fabrication

In December 2021 Agricast installed a new High-Definition Plasma XPR300 plasma cutter. This updated the CNC plasma cutter we had been running since 2013. We are now able to cut sheet steel in thicknesses between 2mm and 50mm. This machine allows us to fabricate subsoiler legs in HARDOX®500 to suit almost any machine and enables us to create custom legs so you can use different wearing parts. We also use this accurate cutting tool to fabricate brackets, end plates and profiles to alter and adapt your heavy cultivation machines:

- add cultivation tines to your press;
- convert your single press to a double press;
- change your crumbler bar and scrapers;
- see your ideas cut out and on our machine.

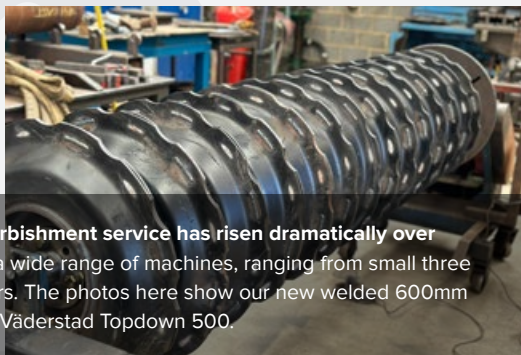

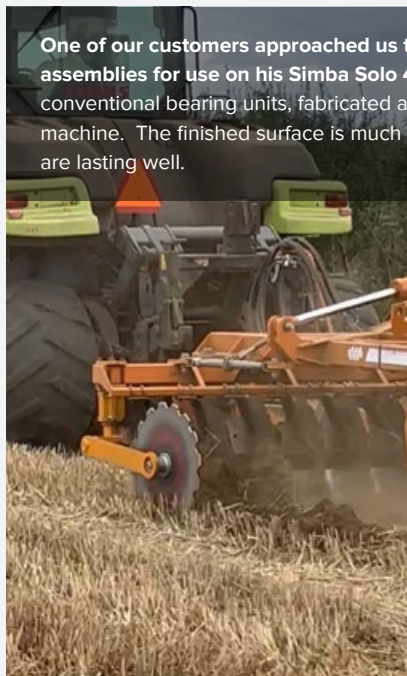

Our small team of experienced and detail orientated engineers ensures that all parts are made to the highest quality and made promptly so you get your parts as soon as possible.

CALL US
TO DISCUSS

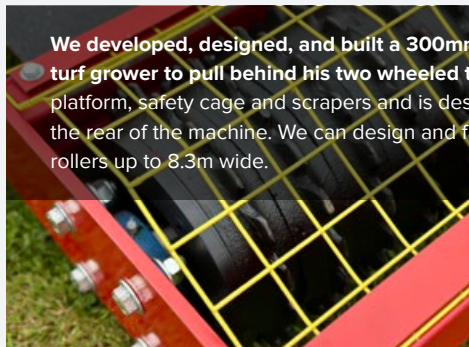

01673 857619

One of our customers approached us to make a set of covering coulter type disc assemblies for use on his Simba Solo 450. We modified the OEM layout to use more conventional bearing units, fabricated and fitted the LH and RH units to the customers machine. The finished surface is much more even and the custom made Hardox450 discs are lasting well.

Demand for our complete packer refurbishment service has risen dramatically over the last year or so. We've worked on a wide range of machines, ranging from small three leg subsoilers up to 12m wide cultivators. The photos here show our new welded 600mm packer being fabricated and fitted to a Väderstad Topdown 500.

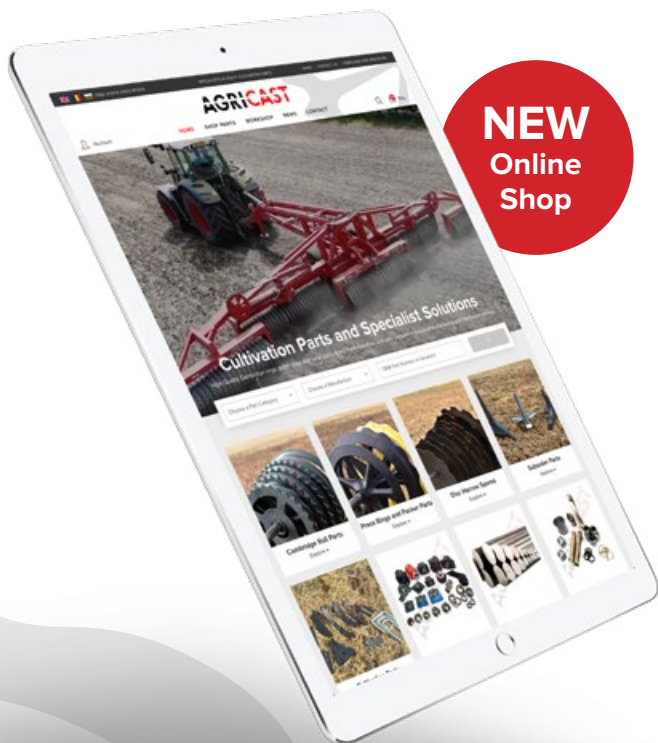

We developed, designed, and built a 300mm diameter grass wheel roller for a UK turf grower to pull behind his two wheeled tractor. The roller incorporates a work safe platform, safety cage and scrapers and is designed to be welded to a bracket mounted to the rear of the machine. We can design and fabricate 300mm and 400mm diameter grass rollers up to 8.3m wide.

Custom Grain Pusher Conversion

A (very) local farmer asked us if we could extend a pusher for use on a loading shovel. It was quite a challenge, but we made it work and added 4.5m into the centre, making it 9 metres long! You can see more photos of this custom-engineering project on our website.

Explore our new website offering detailed information on
over 1,500 wearing parts: www.AGRICAST.CO.UK

Established in 1987 and based on the family's Lincolnshire farm,
Agricast is the UK's leading Cambridge roll ring specialist and also supplies
a wide range of press rings, disc blades, and subsoiler parts.
